
optimized for smartphones

Posted by brugal - 2013/08/15 09:15

Is it "ari quiz lite" optimized for smartphones? and, "ari quiz"?

=====

Frontend part of "ARI Quiz" v. 3.5.0 will be fully compatible with mobile devices. "ARI Quiz Lite" is partially compatible.

Demo page of "ARI Quiz Lite" is available here. It is a free extension and you can also install it on your site (for example on local machine). Not fully compatible means not all pages will look fine on mobile devices.

the demo page you have linked is not optimized for smartphones, i think. I would like to watch one to know which pages look like fine on mobile devices.

I may not have said before, but I am very grateful for your help!

i've already done it. But my site is not still optimized for smartphones, and I don't now how it will look like.

I just asking for a page(yours or one of your costumers) optmized for smartphones that "Ari quiz lite" is integrated to watch now how it looks like.
