
Database table which has results

Posted by jamijares - 2010/06/01 15:42

Hi

Please I need to extract the results of the Ari quiz Lite test results and integratethose into an external system.

Please

Which is the DB table that contains the results?

I need the userID, the test result and the date.

Thank you

Hello,

The components stores results in '#__ariquizstatistics' and '#__ariquizstatisticsinfo' tables where '#__' is Joomla! table prefix, usually it's 'jos_'.

Regards,
ARI Soft
