Created a new translation, but ...

Posted by joomdev - 2010/06/03 11:05

_____

I created a new translation for the backend and everything looks alright (in the new language) except the toolbar with "Quizes" "Quiz Categories" "Question Categories" ... "F.A.Q." "About". All these are still in English. Any idea why?

_____

Hello,

Joomla! stores menu items names in database. We'll add INI languages files for translation menu items in a future release of the component.

Regards,
ARI Soft
