
continue button

Posted by amitvns04 - 2014/01/03 14:49

I want to rename the continue button

1- it should be red in colour instead of grey

2- its label should be "start test" instead of continue

=====

Labels can be changed on "Languages frontend" page on component backend.

\components\com_arquizlite\view\quiz.html.php template file is used for quiz description page. You can modify it for your needs.

Regards,
ARI Soft
