ive used your ari quiz lite module and it work perfectly! just as what i needed. but there is a thing i want to ask. is it possible to remove the word "Choice" in the answers? i just find it kinda redundant having the answer provided then the word "Choice" above. thanks and more power!

Hello,

"Choice" label can be removed or changed in language file. See "Languages Frontend" section on component backend.

Regards,
ARI Soft

thanks to your reply. Ive managed to remove the word "Choice"... But it left numbers before each radio button. its like this now.

1 (radio button) The correct answer.

2 (radio button) Wrong answer.

3 (radio button) Wrong answer.

Is it possible to remove those numbers before each radio buttons? thank you in advance!!

Add the following CSS rule to a site template CSS file:

```
.ariAnswerChoice LABEL
{
    visibility: hidden !important;
```

}
