
possibility of sending results of test for guests

Posted by hydralk - 2014/05/15 15:21

Hello.

I have a question of possibility of sending results of test for guest via e-mail.

I need this structure -

The first is a guest of my website inserting his mail in the field of test.

And the second is after passing the test the ARI QUIZ system sent the result of test to the inserted mail.

I have found nothing to do what i need.

May be i can do it by script or it possible in pay version?

Great thanks.

Hello,

"ARI Quiz Lite" can send results to registered quiz takers at the end of a quiz. For this select mail templates in "Successful Email Template" and "Failed Email Template" drop-downs in quiz settings. It is also possible to send mail to specific mail addresses. For this enter emails in "Send Result To -> Email" parameter and select a template in "Send Result To -> Template" parameter.

Regards,

ARI Soft
