Hello,

"ARI Quiz Lite" doesn't have this limitation. It is possible to populate quizzes with any number of questions.

it's strange but it takes about 20 minutes when new all questions are visible. another remark - when module Ari quiz results is ON, there is not chance to show quiz list. This list is showned after OFF Ari quiz results.

1. It seems you haven't completed the previous quiz session.
2. What exactly doesn't work when module is enabled? Do you see a blank page, error message or something another?

Could you provide a link to a page where we can see the problem and a temporary access to your J! backend by email so we can investigate the problem?
