error with JoomlaCK editor

Posted by totetite - 2014/06/19 07:43
_____

Dear all,

If i use the editor Tiny-MCE it is OK
If i use the editor JoomlaCK I can not save the quizzes

Please help me.

Hello,

We have tested the component with default Joomla! editors. Probably JoomlaCK editor causes problems when several editors are used on one page.

BTW, "ARI Quiz" supports ability to select what editor will be used by the component and it works fine with most of popular editors.

Regards,
ARI Soft

Having similar problems while evaluating ari quiz lite.

When saving question I got error "question is required" even the question is typed on editor. This happens when using JCK editor version 6.5.8 with Joomla 3.3.1. Tested also with TinyMCE ja JCE.

Hello,

We have checked it on a fresh Joomla! 3.3.1 installation with default Joomla! TinyMCE editor and questions and quizzes are saved fine. Could you provide a temporary access by email to a site where we can see the problem with TinyMCE editor?

Regards,
ARI Soft

Hi,

As I mentioned on my previous post. Problem is with JCK editor.

Repeating your standard answer is not helpful and doesn't turn evaluating customers to paying customers. Promising product but bad support makes me to look for another products.

_____

It is a not standard answer, it is the answer to question about the problem with JCK editor. "ARI Quiz Lite" is a free extension which is developed in spare time. It provides base functionality to create quizzes and tested with standard Joomla! editors.

In your case you can disable validator for question. For this open \administrator\components\com_ariquizlite\templates\question_add.html.php file and comment or remove the following code:

```
aris.validators.validatorManager.addValidator(
 new aris.validators.customValidator('zQuiz',
  function(val)
  {
   var isValid = true;

   var value = val.getValue();
   isValid = (value && value.replace(/^\s+|\s+$/g, '').length > 0);

   return isValid;
  },
  {emptyValidate : true, errorMessage : ""}));
```

_____

Just use "floppy" symbol to save content in JCK. Close then.
