\"Registered\" Only Access not showing...
Posted by valerie - 2010/06/24 01:09

_____

Hi, I have searched the forum and didn't find an answer. I have created a quiz and set the quiz to be for "Registered" Access (User Group). Now when I go to the LIVE site and select the Quiz name, I can see the "description", but nowhere does it tell the user they need to login/register to take the quiz.

When I set the Quiz back to "Guest" I can then see the "Continue" button underneath the Quiz description.

What am I missing in restricting the quiz to "Registered" users only?

Thanks!

_____

Hello,

Do you mean "ARI Quiz" or "ARI Quiz Lite"?

Regards,
ARI Soft

_____

Hello,

Do you mean "ARI Quiz" or "ARI Quiz Lite" component? If you mean "ARI Quiz", what version you use?

Regards,
ARI Soft

_____

I answered above that I am using the Lite version that I downloaded from your site last week.

_____

Post questions about "ARI Quiz Lite" in appropriate forum topic, please, because "ARI Quiz" and "ARI Quiz Lite" are different components. Regarding you question, the component hides "Continue" button, if a user doesn't have access to take a quiz. "ARI Quiz" hides this button too, but it can display message that a user doesn't have access to selected quiz. "ARI Quiz Lite" doesn't provide this possibility.

Regards,
ARI Soft
