To have marked when answer click anywhere
Posted by M.Crane - 2014/09/30 17:49

_____

Hello there, how can I change this code shown below to have possibility to mark answer to click anywhere. Label or answer, whatever I will have my mouse on. And will be good when mouse can show cursor as the hand.
Thanks for any suggestion.

_____

Hello,

You can wrap answer text with tag like "Choice" label.

Regards,
ARI Soft

Thank you for your time, it's works enough good at this moment. I still have the cursor like over the text. But it is not very important for me now.
Thanks again.
