Hello,
I feel a little bit dump to ask this question but since there are no stupid questions, I give it a try.

Where to do I embed the Quiz in my content, that it is visible on the website?
I cannot find anything anywhere...
I created the Quiz with Questions, and now I want to display it that it can be used...

Hello,

Create a menu item in Joomla! menu manager with type "ARI Quiz Lite -> Quiz List Layout".

Regards,
ARI Soft
