Change language

Posted by Stoph - 2014/09/30 19:03

_____

Hello,
I want to change the langauge of the frontend. I am aware that I can change the language in the settings 'languages frontend' but that leaves some parts of the quiz still in English, German or Russion.
I want to change the language of the 'continue' button for example, or the 'complete' next to the bar which shows how far the quiz is completed or the "choice 1", "choice 2" which appear with multiple choice questions etc.

Where would I change that?

_____

Hello,

Click by a language name on "Languages frontend" page and modify labels which you want, save it. Select the language with help of radio button (in "Default" column) and click "Default" button. That's all.

Regards,
ARI Soft

_____

Perfect. I did mark it as default, but I chosed the very first box (left side) not the radio button far on the right hand side.

Thanks!

_____

Hello,

Sorry, my english is bad ...
I can not translate on the frontend of words in French
for example I would replace Correct answer by Répose correcte ...

Many thanks in advance

_____

Hello,

Open "Components -> ARI Quiz Lite -> Languages Frontend" page, choose an existing translation or create a new one (click "Add" button in toolbar) and translate labels which you want. After this choose the translation as a default translation. For this select it with help of radio button in "Default" column and click "Default" button.

Regards,
ARI Soft
