Change UserName in module result
Posted by jlz13fr - 2015/01/22 10:15
_____

Hello,
I use Ari Quiz Lite and I want to change in result module the UserName bye the login name.
I found this line in ariquizresult.php

but how to modify it by Login name?

Best regards

Hello,

See "getLastResults" method in /administrator/components/com_ariquizlite/kernel/Controllers/class.ResultController.php
file.

PS: "ARI Quiz Results" module from "ARI Quiz" extension supports ability to choose what field (login or user name) will
be shown in module settings.

Regards,
ARI Soft

_____

thanks for yoir answer
but my skills in php and sql are too low for me to know what to change in these line.

I suppose a change in U.name AS UserName but what can I change?

L.login, U.login, ...?

sorry for this stupid question

regards

_____

It requires to extend SQL query that it selects user login and then show this field in the module.
