Other user level to add a quiz/question?

Posted by haisesasaki - 2015/02/14 14:35

Is it possible for other user level to add a question/quiz beside the admin? Because I have teacher-access level and I want them to make the quiz themselves.. Suggestions? Thank you :laugh:

Hello,

The extension doesn't support ability to define available actions for the selected user groups and doesn't support ability to create quizzes on frontend.

"ARI Quiz" supports ability to specify what actions can be done for users from the selected user groups on component backend. You can read about it here. "ARI Quiz" v. 4.x will also support create quizzes on frontend.

Thank you! By the way, is it possible for the user to take the test only once?? Another thing bro, I set Passed Score to 3, and I only have 5 questions which is equivalent to 1 point each. I got 2/5 still pass? What am I missing?

See "Attempt count" parameter to limit number of attempts.

"Passed score" parameter accepts value in percent.

Thank you so much admin! So I set Attempt Count to 1 and the Continue button won't appear. How can I do this, instead of the Continue button not appearing I will put a text saying "You've already taken this quiz" Thank you!

Only "ARI Quiz" extension supports this ability.

The extension can show results only of currently logged user on frontend.
