Hi

The ARI Quiz Lite only worked once on the site and didn't work again.
I click on the assessment links but nothing happens.
I am testing this locally on my system before i deploy on the internet.

Please assist I need to deploy this site soon.

Regards
Thabang

Hello,

Could you provide a link to a page where the problem occurs and a temporary access to your J! backend by email so we can investigate the problem?

Hello,

We can investigate the problem when your site will be available (on a test server for example).

The ARI Quiz Lite works after installation, if I close and open the website the plugin doesn't work anymore.

Can you log in remotely? I can log you into Teamviewer.
Because i need to show this to a client before deployment.

Reproduce the problem on a test public server so we can investigate it.

Hello,

It is not possible to login to backend part of your site. The following error occurs:

"You do not have access to the Administrator section of this site."

This is a problem with site template. It doesn't load components output. For example it doesn't load output of com_content component (standard Joomla! component which is used to manage articles):
