
problem with creating options

Posted by adivikash - 2010/07/20 10:04

Hello

I am using ARI QUIZ LITE...

When I create questions (Single Question Type) and enter 0 as one of the options, nothing gets displayed in the front end display!

I guess when entering 0 (zero), it assumes blank

i am creating simple maths test which have options as 0

Any help would be appreciated?

Thank you!

Hello,

Download and re-install the component, please.

Regards,
ARI Soft
