Jump the \"continue page\"

Posted by adolcini - 2015/09/04 08:52

_____

Hi I'm using Ariquizlite and I'd like to connect a menù item directly to the first question, is it possible ?

Now I have:

menù --> "start your test" --> I reach a page where I must click "continue" then I reach the first question.

My desire is:

 menù --> "start your test" --> first question

I tried to copy the link of the first question and put this link in the menù item as external url but sometimes works, sometime not work.... I don't think this the right solution.

any suggestion ?

Many thanks
Andrea

_____

Hello,

"ARI Quiz Lite" doesn't support this feature. It is supported by "ARI Quiz".
