Show Correct Answer change the class of the butto
Posted by niki - 2016/01/02 22:09
_____

Hi,
Where i can change the class of the button Show Correct Answer. The class is aq-btn-correct-answer but the only place i found this code is in style.css.

Can you tell me from where i can change that? My template has some nice styles and i want to use them.

Thanks

==

Hello,

What version of the extension do you use?

_____

The email contains all necessary information. We sent original version of /components/com_ariquiz/assets/js/questions.js file where the button is created.

Regards,
ARI Soft

_____

Yes, this is unminified version of questions.js file which is used by the extension.
