## ARI Quiz Lite

Posted by Guybrush - 2016/03/20 21:12

---

Hi,

I recently installed "ARI Quiz Lite" to test it at my website. The backend is secured by .htaccess password. Every guest get's now asked for the backend password as the first question appears. Is this an error only in the "lite"-Version of ARI Quiz?

Greeting from Germany

Uli

Hello,

"ARI Quiz" doesn't have this problem.

About "ARI Quiz Lite", it loads some javascript files from backend part. The problem can be fixed if added .htaccess like described here to /administrator/components/com\_ariquizlite/js folder.

Regards,

ARI Soft
