
Change score according to chosen answer

Posted by Profesor Berkeley - 2017/01/31 04:10

By default, the questions "Multiple Question" are correct if the student chooses all the correct answers.

My goal: That the score change according to the chosen answer.

For example:

if I choose answer 1, the score = 3

If I choose answer 2, the score = 2

If I choose answer 3, the score = 0.

Any idea?

Reggards! :S

Hello,

"ARI Quiz Lite" doesn't support this ability. "ARI Quiz" contains "Multiple Summing" question type. It is used to sum score for each selected answer.

Regards,
ARI Soft
