Emailed quiz results - \"from\" field

Posted by tmurray - 2010/08/18 23:51

_____

We're up and running with ARI Quiz Lite, but were wondering if there is a field that allows you to control where the emailed quiz results are sent from. We don't remember entering a specific email address when setting up like we had for directing who the quiz results are sent to. When the email is automatically generated, it shows as though one of our employees sent the email, but we would rather it appear from a "noreply" email address.

Any assistance you can provide would be greatly appreciated!

Best,
Tamara

_____

Hello,

The component use default email which is defined in Joomla! configuration settings.

Regards,
ARI Soft
