
server migration

Posted by Lemonbear - 2010/09/28 15:14

Hello i have transfered my website on another host and now some of the menus or the quizzes i cannot exactly locate what. are redirecting the pages to the old server...

i.e. i created new menu link with selected quiz.. and it redirects me to the old server...

please help

Hello,

Provide temporary access to your Joomla! backend by email that we can investigate this issue.

Regards,
ARI Soft

never mind, i fixed the problem.
thanks

however i have found another. Hot Spot questions are not working, the image is not showing at all. I tried to create new question.. and nothing as well.

Please don't ask me to give you access to the backend, since i am not allowed to do that. I am not the owner of the site.

The hosting we use now is Cirtex if it helps somehow to know it.

thanks in advance

Sorry, but if you can't provide link to page where we can see this issue, we can't help because we need to investigate this problem.

Regards,
ARI Soft
