## Count problem

Posted by meroving - 2011/01/04 10:03

---

Hello,

I installed AriQuiz Lite and did that:

- 1, created a Quiz Categories
  - 2, created a Question Categories (Question Count: 5)
  - 3, created a Quiz (Question Count: 5)
  - 4, created 39 question below Quiz / Question List
- I use random question option as well.

After that on front-end i see always 39 question instead of 5 random.  
Can u help me about that?

Regards, M

Hello,

Check that the latest version of the extension is used (v. 1.0.9). If it doesn't help, provide temporary access to your Joomla! backend by email and we will investigate this problem.

It seems you started a quiz session and after this change 'Question Count' parameter. Complete previous quiz session and take the quiz again, the quiz will contain only 5 questions.

Hi,  
Sorry for bad english, i come from germany ;-)

i've the same problem, can you help me too?  
my quiz has 22 questions and question count set 20

---

When i start the quiz in frontend, there 22 questions, not 20

Hello,

If you assigned questions to question categor(ies), use "Question count" parameter in question category settings.

Oops, thank you.  
Worked fine ;-)

Greetings
