## ARI Slider work with IE, but not work in Chrome

Posted by diy0422 - 2011/02/21 22:48

---

I run Joomla 1.6 in my laptop, installed ARI slider. it work fine in IE, but in Google Chrome, it only display one image, do not slide.

any help will be much appreciated  
Michael

Problem solved:

I just downloaded the new Chrome and reinstalled, the ARI slider work fine.

thanks for everyone  
Michael

It could be a conflict with 3rd party extension for previous version of Google Chrome. For example if several instances of jQuery javascript library are used on a page it can cause problem in old versions of Google Chrome. If the problem returns back, provide link to page or page files (this process is described here) and we will investigate this problem.

Regards,  
ARI Soft
