## Link to specific slide within Slider?

Posted by jmiller251 - 2011/02/23 05:34

---

Hi,

Is there a way to link directly to a specific slide within my ARI Slider? (instead of just linking to the page)

Thanks!

-J

Hello,

Do you want to enter content slides one by one manually in module settings?

Right now I'm linking each slide to a Joomla article, so yes, I think I have been entering content slides manually.

For example, my ARI Slider is located on index.html. When I browse to index.html, I always see the first slide in the Slider. Is there a way to link to index.html, but for the second "slide" to show up (or the third, fourth, etc..)?

Thanks,

It is impossible, but we can add possibility to enter menu item ID(s) for what specific slide will be used as default slide.
