
Any way of add a background color?

Posted by mistan - 2011/03/06 08:50

Is there a way of adding a background color or image for the slideshow?

Thanks.

You can use the next code into "Styles" parameter that define background of the slider:

```
{ $id } .ari_slider_item
{
  background-color: red;
}
```

or we can add new parameter into module settings that define background color of the slider.
