Only first slide shows in Internet Explorer 9

Posted by code7 - 2011/05/30 10:33
_____

Hi we have used two instances of the slider:

http://www.code7webdesign.co.uk/mrgleamfinal/
http://www.code7webdesign.co.uk/mrgleamfinal/index.php?option=com_content&view=article&id=9&Itemid=10

All works fine in all browsers (inc IE 7 & 8), but in IE9 only the first slide shows.

We have a lot off CSS going on but I have tried removing it all, taking the articles back to just text, and using the Milky Way template, still the same problem (actually in MilkyWay the buttons dont even show), have tried adjusting module settings as well, I must be missing something, can anyone help?

Thanks

Dan

_____

Hello,

This problem with configuration of the extension. It seems you have disabled loading of jQuery library in module settings and use old version of jQuery so the module works incorrectly in IE 9. Update jQuery version to v. 1.4.4+ or enable jQuery loading in module settings.

Regards,
ARI Soft

Thanks, you are correct, its actually the breezing forms component that is causing the issue, they are using an older version of JQuery, and its conflicting with yours.

Ill contact them and see if there is a solution, or maybe just remove their library...

thanks for your help

_____

Joomla 1.5.21

I have the same problem with IE 9 on my website.
http://www.estudiohr.com/index.php/en/projects.html

I undertand that I need to us a newer version of JQuery, therefore I installed this plugin in order to use jQuery 1.6.4 or 1.7.1: http://extensions.joomla.org/extensions/core-enhancements/performance/jquery-scripts/10236

I'm not sure wether this is the correct way to do.

How can I get the module to work?
In order to download the latest version of ARI Slider I have to buy it again?

Thank you for your support.

_____

Hello,

Upgrade "ARI Slider" module to the latest version. It is available in "Member Area" on our site.

Regards,
ARI Soft

_____

Thank you for the information,

I installed the new version but the icons have dissapeared now. Can you see why?

_____

Probably you have modified the module before to change path to icons.

Regards,
ARI Soft

_____

Hello,

thank you for your fast reply.

You were totaly right. I changed the path to the icons.

I'm sorry for having forgotten it.

Thank you again.
