
Slider shows on position but no images...

Posted by marior - 2011/05/31 22:43

just installed ARI slider but can't get it to show the images...

I see the module position shows a blank panel where the images should load, but no images.

I uploaded the images per your instructions ("If you want to add new images, copy it to /modules/mod_arislider/includes/js/img/slides/ folder") They are visible on the "dropdown with images" I selected them (4) and also successfully modified your CSS to get rid of the drop shadow.
Could you give me some feedback on how to proceed?

test site is located @ here

Hello,

The slider doesn't contain any items so navigation images are not shown. Check that "Source type" parameters section is configured correctly. New images can be selected in "Source type -> Articles (Simple Mode) -> Slider Item -> Image" parameter or in "Source type -> Articles (Advanced Mode) -> Slider Item -> Image" parameter.

Regards,
ARI Soft

That's what I did. You can see my images names on Slider item#1/Image and so forth. So slider "sees" the images on the remote server, but they don't show up on home page. Is it an image "path" issue?

I do not see any "Image path" parameter textarea on Slider's interface ether...

Thanks

Sorry, but we can't see module configuration on your server. Provide screenshot of module settings page or temporary access to your Joomla! backend by email that we can investigate the problem.

Regards,
ARI Soft

I am having the same problem. I inherited this site and I've added two articles, but the images do not show up in the slider. All the others show fine, so the parameters are correct.

Nevermind. It was the dimensions of the images.

i have that error message:

"NetworkError: 404 Category not found - http://theurl.de/new//modules/mod_arislider/includes/js/img/slides/-1"

it makes two slashes (//) in front of modules. i dont even load an image...its an SEO problem...

Re:Slider shows on position but no images...

Posted by admin - 2013/12/01 13:18

Use the following value for "Image path" parameter:

modules\mod_ariimageslider\images
