How do you add images?
Posted by ElanKaney - 2011/06/06 20:25

_____

I read the /mod_arislider/... notation, but that is not specific enough for me.

Can you please explain it in more simple terms?

_____

Hello,

Login to your server by FTP or install Joomla! file manager extension like eXtplorer, open /modules/mod_arislider/includes/js/img/slides/ folder on your server and upload new images to this folder.

Usually hosting panel contains file manager which provides ability to upload files to selected folder.

Regards,
ARI Soft
