
slideshow align

Posted by alejandrowa - 2011/06/16 01:01

Hi

I just bought and setup the ari slider extension, so far so good, just I dont get to align it.

<http://www.oceansbydaystar.com/es>

Can anyone give me a hand please?

Appreaciate !

Thanks

Hello,

If you want to remove left padding, add the next CSS rule to "Styles" parameter in module settings:

```
DIV.ari_slider_item_inline
{
padding: 0;
}
```

So I just put this code from the backend and it works?

Enter this code in "Style" parameter in module settings page and the module loads entered CSS rules on frontend.

hi

I just added the css and is aligning correctly to the left, any ideas to align up ?

Thanks

Top and bottom padding appears because images are wrapped with
in articles. Add the next CSS rule:

```
.ari_slider_item_inline P
{
  margin: 0;
  padding:0;
}
```

and decrease slider height.

So far so good ! thanks !

Last point , I want to adjust the small thumbnails to look like this ones :

www.oceansbydaystar.com/en

How can I achieve that?

www.oceansbydaystar.com/es -> aligned !!!

If you want to use custom icons, upload them to /modules/mod_arislider/includes/js/img/slides/ folder.
