
Only first news is shown but others can't see

Posted by shehzi - 2011/08/03 21:52

Hi,

I bought your ari slider module and i love it but there is a issue in my website. please have a look:

<http://www.wamy-sa.com/index.php?lang=ar>

If we look at the first news it is showing but when i click on other images i can see tooltip but no article intro text other all empty...

And also is there anyway i can get thumbnail from article and display in the menu without selecting manually images one by one...

Please help ASAP thanks in advance...

Hello,

The problem appears because RTL language is used in your site. Add the next CSS rule to a site template that fix the problem:

```
DIV.ari_slider
{
    direction: ltr
}
```

About thumbnail, could you explain how the extension should get thumbnail from articles?

Regards,
ARI Soft
