
slider & sexy lightbox compatible 2 joomla 1.7

Posted by mythic_master - 2011/08/11 11:18

I'm considering upgrading my joomla from its current 1.5 version to 1.7.

Will these plugins work on jom 1.7?

If not, when is the ETA / expected date for upgrading these plugins for 1.7?

I just purchased slider & sexy LB and would also like to know if I will be able to download upgrades for these plugins without being charged extra.

Please advise.

Hello,

The extensions are compatible with Joomla! 1.7. The latest version of the extension can be downloaded in "Member Area" on our site.

Thanks for the quick response.

I just purchased both plugins a few hours ago and have already installed them in my joomla 1.5. They are working fine.

Does that mean the plugins I have are compatible with joomla 1.7 versions?
