more than 10 or 12 articles in advanced mode

Posted by bryanbgdwebcom - 2011/09/20 14:08
_____

Hello.

I need to add 20 (or more) articles to a slider.

I can add the articles but once I reach the 12 slide then click the next button the slider goes crazy and zooms past multiple slides to some odd slide as a starting point then to my next slide. Here's a link:

http://www.guypeterson.com.php5-20.dfw1-1.websitetestlink.com/index.php/revere

I upgraded to Ari Slider 1.7.10
I have the Article (advanced mode) article count set to 20 and have selected a category for content.

Should this be working or is the zooming past multiple slides the way it works after 12 slides?

Please let me know.

- - - - - - - - - - - 2nd post - - - - - - -

I noticed that what I described above as "a crazy zoom past multiple slides" is the slider going back to the first slide (1 of 20) and then sliding to the next slide (13 0f 20) once on # 13 if I click the previous arrow it goes to 1 of 20 and then slides up to #12.

I've been working on this for quite some time. No help?

Did I need to update plg_system_ariextensions and plg_content_arislider?
I only updated mod_arislider since it was the only one with a different modification date.

thanks for any help I may receive

_____

Hello,

Sorry for the delay. Download and upgrade the module. It should help.

Regards,
ARI Soft

Oh, sorry, I mention in the post above that I upgraded the module to 1.7.10 then I asked if I needed to also update plg_system_ariextensions and plg_content_arislider since they didn't seem to have changed.

Did you read that part?
Is there a more recent update than 1.7.10?

Please let me know.

_____

We have updated the module (v. 1.7.11, it is available in "Member Area"). Update only the module please, it should help.

Regards,
ARI Soft

_____

Installed 1.7.11 module

Works Great! Thank you.

_____

Is it possible to have more than 20 slider items in the thumbnail navigation?
Thanks, Chris

_____

Hello,

Could you specify how many articles do you want to use?

Regards,
ARI Soft

_____

The number is approaching 20 and may increase to as many as 50?
Thanks for the quick response.

_____

It is possible to increase these parameters in module manifest file. See \modules\mod_arislider\mod_arislider.xml file.
For "Aricles (Simple Mode)" see the next section:

20

For "Articles (Advanced mode)" see the next section:

20
