how to resize the thumnail size

Posted by sttnai - 2011/10/07 02:53

_____

hi,
we purchased ari slider in previous month and i have a question.

I'd like to resize the thumbnail size
(I want to resize the thumbnail 150px for the width and 100px for the height)

but, the problem is that the thumbnail can't be larger than 50px for the width and 33px for the height.

i also tried to resize in slider.css but no result.

is there any solution?

Thanks http://www.ari-soft.com/images/fbfiles/images/arislider.jpg

_____

Hi, now, i resized the thumbnail
So, I share to the others how i configed
The thing i made is i edited the class in slider.css :)

```
.ari_slider .ari_slider_menu {
 height:110px; /* The height of thumbnail size have to be assigned */
 position:relative;
 text-align:center!important;
 width:100%;
 overflow:hidden;
 left:0;
 z-index:102;
}
```

```
.ari_slider .ari_slider_menu UL LI {
 width:160px; /* Width of the thumbnail size that have to be assigned */
 display:inline-block;
 list-style:none;
 height:110px; /* Height of the thumbnail size that have to be assigned */
 overflow:hidden;
 float:left;
 margin:0;
 padding:0;
 text-align:center;
}
```
