Rotate Stops at the Last Slide

Posted by jbulski - 2011/10/12 15:25

_____

Hi -

I have set the ARI Slider option for Auto Rotate to 9000 milliseconds. The slider successfully rotates from the first slide to the second but not back to the first. I only have 2 slides in the slider right now. I have tried this with the Reverse Rotate option both on and off and it still stops. You can see the slider here: http://www.edgenet.com/.

Any ideas?
Thanks.
Judi

_____

Hello,

Sorry, but it seems the slider works fine. It slider from the first to the second slide and then to the first again.

Regards,
ARI Soft

Yes, thank you. You are correct. I'll just blame it on cache :). Sorry to have bothered you.
