
Issue with Text in Internet explorer 8

Posted by nicek - 2011/11/10 17:25

Hi,

Having an issue with the Ari slider in IE8.

The slider can be seen here .if you flick through the slides in IE8 you will see that the headings become distorted. see screenshot attached also.

Do you know a fix for this?

This ari slider is installed on joomla 1.5.22

Thanks in advance http://www.ari-soft.com/images/fbfiles/images/bundle_IE8_copy-f9b14a4ee0a16956bf35c26bcc4e76a0.jpg

Hello,

This is an IE issue. You can read about it here. Add the next CSS rules to fix the problem:

```
.ari_slider .ari_slider_item h3,  
.ari_slider .ari_slider_item h4,  
.ari_slider .ari_slider_item h5,  
.ari_slider .ari_slider_item h6 {  
    background-color: white;  
    filter: progid:DXImageTransform.Microsoft.Chroma(color='white');  
}
```

Regards,
ARI Soft
