Links don\'t work in Chrome
Posted by KhalidHydro - 2011/11/17 20:55

_____

So we have links attsched to each of our images, and this works well in FF and other browsers, but in Chrome the link always goes to the first images' links. You could be on the 5th image but the link is still the first. This is only in Chrome, and I am on an updated version of Chrome. Can you tell me how to fix this? the link for your reference is here.

Thanks in advance for your help.

_____

Hello,

You use old version of the extension (v. 1.3.4). Upgrade it to the latest version (v. 1.6.15) and check again.

Regards,
ARI Soft
