
Same issue with text in IE 9...

Posted by nicek - 2011/11/19 15:22

Hello,

The original issue i posted regarding this was "issue with text distorted text in IE8". Ari Support gave me a perfect fix for this and it works in both IE7 and IE8, many thanks again! (see fix below). However it dosent seem to have worked for IE9 (see image attached)!

From ARi support re: ie8 issue fix:

"This is an IE issue. You can read about it here. Add the next CSS rules to fix the problem:

Code:

```
.ari_slider h3,
.ari_slider .ari_slider_item h4,
.ari_slider .ari_slider_item h5,
.ari_slider .ari_slider_item h6 {
    background-color: white;
    filter: progid:DXImageTransform.Microsoft.Chroma(color='white');
}
```

I assumed this would also be ok in IE9, however i happened to check it on a friends pc and this code modification seems to have been ignored in ie9? I have searched online but cannot find why this is the case. Do you know what would need to be added to the code to fix it for IE 9?

Thanks in advance http://www.ari-soft.com/images/fbfiles/images/ie9_.jpg

Hello,

Could you provide a link to a page where we can see the problem?

Regards,
ARI Soft

Here is the link . The text issue is not on other pages in IE9, it seems to be only text rendered through the ari slider module?!..

The slider looks normal in IE 9 on provided page:

Try to use the next CSS rules instead of previous CSS rules:

```
.ari_slider .ari_slider_item h3,  
.ari_slider .ari_slider_item h4,  
.ari_slider .ari_slider_item h5,  
.ari_slider .ari_slider_item h6 {  
    background-color: white;  
    -ms-filter: progid:DXImageTransform.Microsoft.Chroma(color='white');  
}
```

If it doesn't help, could you provide temporary access to your J! backend by email so we can investigate the issue in more details?

Regards,
ARI Soft

Yes that worked. Seems to have been the "-ms-filter ". Nice one!
