
Limit Scrolling in Menu - Too Much Blank Space

Posted by DaveBarry - 2011/11/29 08:40

Hi,

I'm using 7 instances of Ari Slider on www.webgeko.com/events. You can see them by selecting Sunday-Saturday. As you may notice, Sunday's menu consists of four logos and when the slider gets to logo #4, it still looks clean. Monday - Saturday displays a ton of dead space whenever it moves to the next logo. Compare Sunday and Monday to see what I mean. All of the backend settings are identical. I assume this is being caused by a conflict because there are multiple instances of the module. How can I fix this? Thanks!

Hello,

Could you provide temporary access to your J! backend by email so we can investigate an issue?

Regards,
ARI Soft

Awesome, thanks so much! Was it something wrong with the settings or with the code?

You use sliders in tabs. All tab except current tab are invisible and all elements on these are invisible too so the extension couldn't calculate size correctly. We updated javascript files which is used by "ARI Slider" on your site so it can work in tabs.

Regards,
ARI Soft
