
Select the Order of the Slides being displayed

Posted by fellow - 2011/12/09 14:59

I want to be able to sort slides in order..We have 13 slides with 13 images. Order of displayed slides should be newest to oldest, so the first article is the newest one.. Now, every time I want to add a new article, I need to manually delete all slides and select my article to be "Slide #1". I need to do this every time I add a new slide, because we want new slides to be displayed first...

I would like to be able to select the order of the Slides being displayed. Thank you.

If we add "Sort by" parameter and add ability to sort by article created date, is it suitable for your needs?

No, it will be great to have more flexibility because we have articles published at differet dates, so if I want to display slides on a specify order, I need to edit "Create date" on every article on every slide (and select a false date - and this is not a solution).. . A textbox to manually specify Order of the Slides being displayed would be sufficient - like: 13,12,4,6 etc.. A drag and drop ajax interface for arange slides in preferred order will be much better.

We have updated "ARI Slider" module. New version provides ability to set order number manually. For this set "Article -> Sort" parameter to "Ordering" and enter order numbers in "Article -> Slider Item N -> Ordering" fields.
