
J! upgrade 1.5 - 1.7 / ARIsldr upgrade query?

Posted by nicek - 2011/12/14 13:51

Hi,

I have the arislider v.1.0.0 on my 1.5 site at the moment and it is working perfectly. However, I need to upgrade my site from 1.5.22 to J! 1.7 and wanted to know should i install the newest ARI Slider version 1.8.2 first before the migrate? I would like to maintain same parameters and config on the slider as it is now in 1.5. Thanks in advance

nicek

Hello,

You can install the latest version of the module after upgrading Joomla!. Don't forget install and enable "System - ARI Extensions" plugin after Joomla! upgrade (the plugin is included into extension's package).

Regards,
ARI Soft
