Hello,

Sorry, but provided page doesn't contain "ARI Slider".

Regards,
ARI Soft

_____

It is not a "ARI Image Slider" issue. This problem with site template or a 3rd party extension which adds the next javascript code to a page:

It doesn't call jQuery.noConflict() method to avoid problem with MooTools library which is used on your site too.

PS: We can investigate this problem in more details if you provide temporary access to your J! backend by email.

Regards,
ARI Soft
