## Missing \"Alt\" tags for nav arrows

Posted by budfox - 2012/01/10 09:35

---

Hi

I'm getting W3C errors because my nav arrows don't have "Alt" tags specified. I haven't changed any core code, so I'm surprised that nobody else seems to have had this problem.

I can find the php file that inserts the arrows, but I'm not clever enough to edit the code to insert them.

Can you help please?

My site is [www.redwoodjoinery.co.uk](http://www.redwoodjoinery.co.uk)

Many thanks

=====

Hello,

Download and upgrade the module. It should help.

Regards,  
ARI Soft
