
First image only appearing at first animation

Posted by wimverhoef - 2012/04/05 15:08

When loading the page where the Slider module has been installed, the module appears without image.
Only after the "PauseTime" the first image appears very shortly , after which the transition to the second image takes place.
When loading page and going with mouse over the navigation arrow, the first image immediately appears (so it does not seem to be a problem of slow loading)

Thanks for helping me out because the module looks very nice!

Hello,

Where we can see described problem?

Regards,
ARI Soft

Unfortunately I have it only running locally,

Saludos,
Wim

It can be a problem with a 3rd party extension. We can investigate an issue when your site is online.
