## Removing Articles & Images not displayed

Posted by denverw - 2009/12/30 01:20

---

Hello, Initially I had 3 articles displayed, everything was working fine. I attempted to set up the maximum amount of articles to display in the slider and the slider stopped working. There were no small images in the slider.

I tried to remove some of the articles to see how many would work and I was unable to remove the articles.

Thank you

Hello,

Check your mail, please. In brief, possibility for removing articles was missed and we'll add this in the next version of the module which we'll release today. Problem with menu items occurs because your articles contain incorrect HTML code for intro text.

Regards,  
ARI Soft

Hello,

'ARI Slider' v. 1.2.3 is available and it contains button for removing articles. You can download the latest version of the module in 'Member Area' on our site.
