## Pause time

Posted by csinger - 2012/07/01 15:58

---

I have the slider showing in an article, no problem. I have 3 separate templates, one for the home page and two others for other pages. The slider is only on the home page. I am using thumbnail display. I am unable to change the Pause time and have tried several different parameter settings. I read the solution of over a year ago concerning 2 copies of in the template index.php file, but I have only one such line. I am running Joomla 2.5 and the most recent version of the slider. Do you have a suggestion for me? The slides do not pause long enough... maybe 2 seconds each. Thank you.

Hello,

Send your order number by email please and provide a link to a page where we can see the problem.

Regards,  
ARI Soft
