_____

Good afternoon,

Recently I installed ARI Image slider on my http://plantennamen.info.
It works fine with Firefox and Google Chrome but in IE 10 it doesn't show wright. The image does appear dubble at the buttom of the image.
Does anyone can help me with this problem.

Regards, Maarten

Hello,

Could you send a link to a page where we can see the problem and an image where we can see it?

This problem with CSS rules which are used for "photo-slider" by site template. Add the following CSS rule to fix the problem:

```
BODY .photo-slider
{
 position: relative;
 top: -102px;
 margin-bottom: -102px;
 left: 0;
 margin-top: 0;
}
```
