## Preloader Not Showing In Firefox

Posted by flashnam - 2013/02/10 13:07

---

To Whom It May Concern,

I'm busy testing ARI slider and really like this slideshow.

One thing I've noticed thought - the preloader animation (loading.gif) does not display in Firefox and Chrome. Instead of the animation I see the navigation bar (the dots) at the top while the first image is loading and the navigation bar then moves down to its position once the image has loaded.

In IE8 I do not see this behavior - the preloader animation displays correctly.

Any advice on how to fix this would be appreciated.

Best regards,

DJ

Hello,

Where we can see the problem?

Regards,  
ARI Soft

Hallo,

Seems the issue has been fixed. I changed the Load Method to "DOM Ready" and now the slider is loading correctly in all browsers.

Thank you and congratulations on an excellent module. I have tested many slideshow modules and this one is the best.

Regards,  
DJ
