{$fulltext} NOT showing!

Posted by enriched - 2013/02/15 08:19

_____

in ARI Slider module

All variables works except the {$fulltext} variable doesnt work! Its just blank, I tested it on localhost also, still the same result.

I just want to show all content of the articles as is (including its image, text characs, etc...) & make them a slide show.

Thanks

_____

Nevermind, got it working,
{$fulltext} is not enough
I used {$introtext} {$fulltext} & it worked.

 :unsure:

_____

Hello,

It seems your articles don't split into intro and full text.

Regards,
ARI Soft
