## Problem after updating Joomla to v2.5.19

Posted by philiplardner - 2014/03/11 00:39

---

Hi,

I have been successfully using ARI Slider on my Joomla v2.5.9 site for some time. I just updated my site to Joomla 2.5.19 and ARI Slider no longer displays the images in the image folder - all I get is a spinning progress circle.

I tried downloading and installing a fresh copy of ARI Slider but that has not helped.

Is there a compatibility issue with J2.5.19 or does the problem lie elsewhere?

Any help appreciated,

Phil.

Hello,

Could you send a link to a page where we can see the problem?

Regards,  
ARI Soft

Problem solved: I was updating a number of components and modules on my site and I have discovered that the Ads-Manager component is causing problems with a number of other components. Uninstalling Ads-Manager cured the problem. Apologies for bothering you!

Phil.
